

PocketDog Exporter For ArcMap®

Integrate your GIS attributes with PocketDog Field Data Collection

DO YOU MAINTAIN YOUR FOREST STANDS AND INVENTORY PLOTS IN ARCMAP?

ARE YOU STILL MANUALLY CREATING STANDS AND PLOTS IN POCKETDOG?

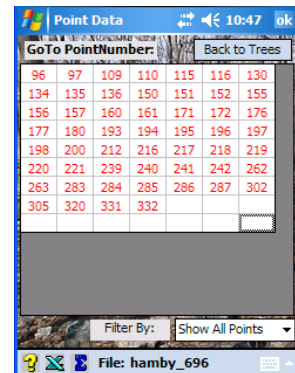

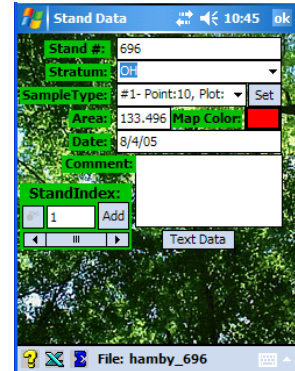

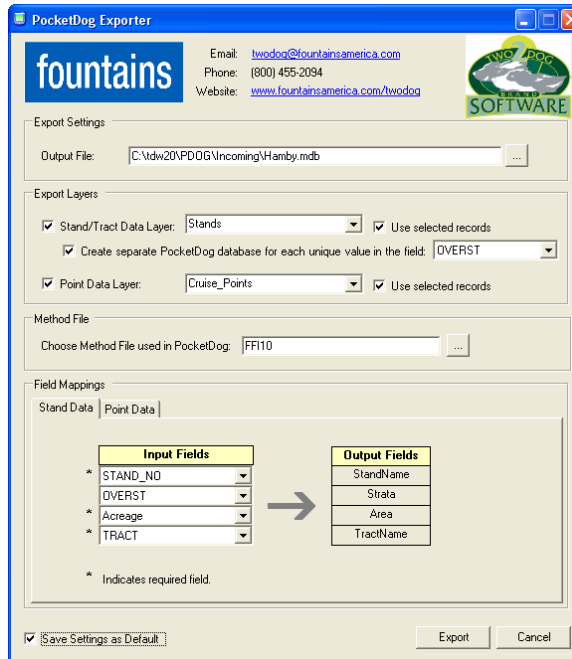

POCKETDOG EXPORTER GIVES YOU A BETTER WAY.

Use the **PocketDog Exporter** to send your stand and plot attributes from ArcMap to PocketDog. With this utility your stand and plot information will be transferred to PocketDog complete with your plots stratified into stands. Simply pick from a plot list in PocketDog and enter your tree data.

POCKETDOG EXPORTER WILL...

- ⇒ Expand Your Mission Planning Options
- ⇒ Dramatically reduce data entry errors
- ⇒ Reduce inventory startup time
- ⇒ Ensure your time in the woods is spent measuring trees
- ⇒ Ensure your field data matches your GIS data

TWODOG SOFTWARE AND POCKETDOG EXPORTER CAN IMPROVE YOUR INVENTORY EFFICIENCY AND ACCURACY.

How Does it Work?

- ⇒ Choose your stands layer
- ⇒ Choose your inventory plot layer (optional)
- ⇒ Use the power of ArcMap to export only the records you select
- ⇒ Choose to create multiple PocketDog files based on your data fields to aid mission planning and improve organization
- ⇒ Match your GIS layer data fields to PocketDog's
- ⇒ Set your plot type to volume or basal area based on a field in your database when double point sampling
- ⇒ Press **Export** to prepare your PocketDog data files
- ⇒ Send your data to PocketDog via OfficeDog, OR
- ⇒ Email files to field personnel

Help your organization leverage more benefit from its GIS. Use **PocketDog Exporter** to improve your inventory efficiency and accuracy. The benefits don't stop with PocketDog. Once you've collected your tree data, transfer this information into OfficeDog for calculation and reporting. All of your data are then stored in MS Access and easily linked back to your GIS.
