

## Ranger3

The Ranger 3 rugged computer replaces the Ranger X rugged computer and is substantially more powerful, with more integrated features. The Ranger 3 handheld integrates features and processing power that customers and software developers are looking for to support advanced applications and mobile computing solutions.

### The Ranger 3 computer standard features include:

- 58-key tactile QWERTY alphanumeric keypad
- Sunlight-viewable touchscreen display with VGA (640 x 480) resolution for detailed graphics
- AM3715 Sitara™ ARM® Cortex™-A8 superscalar processor operating at 800 MHz and featuring intelligent power management that adjusts processing power to the demands of the software
- Windows Mobile 6.5 Professional operating system featuring a new user interface that supports flicks and gestures
- 8 GB of Flash storage, plus an SDHC memory card slot for more storage
- GPS receiver with SiRFstarIII chipset and SiRFInstantFixII for faster time-to-first-fix
- Compass for capturing bearing data
- Accelerometer for capturing tilt information
- Customer selectable language when the unit is first powered on, and the supported languages are English, Simplified Chinese, French, German, Japanese and Spanish.
